ABSTRACT

Provide on a separate page an abstract of not more than 150-250 words. A concise and factual abstract is required. The Abstract should be informative and completely self-explanatory, briefly present the topic, state the scope of the experiments, indicate significant data, and point out major findings and conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, standard nomenclature should be used and abbreviations and references should be avoided. The preferred format of all manuscripts is in Microsoft word format and should be concisely typewritten in 1.5 spaces in A4 sized sheets. Use English language throughout the main text, specific use of any other language or words must be typed in *Italics*. The pages shall be numbers consequently. Only on one side, with normal margin on all sides. The manuscript shall be prepared in Times New Roman using a font size of 12 and title shall be font size of 14, bold space capitals. All section titles in the manuscript shall be in font size 12, bold face capitals and subtitles in each section shall be in font size 12, bold face lower case. Illustrations (Figures & Tables) must be inserted at appropriate place in the article. Standard International Units should be used throughout the text. Pages should be numbered properly. There shall not be decorative borders anywhere in the text including the title page.

KEYWORDS: Provide, three to five, appropriate keywords, after, the abstract

Copyright © Author(s) name, 20xx, this is an open-access article distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution and reproduction in any medium, provided the original work is properly cited.

INTRODUCTION

The manuscript should be starting with the title page and the text should be arranged in orders as; Title Page, Abstract, Keywords, Introduction, Materials and Methods, Results and Discussion, Conclusion, Acknowledgements and References. This section should be concise and define the background and significance of the research by considering the relevant literature, particularly the related researches and recent publications. When preparing the introduction, it must be important to think that some readers will not be experts in your field of research, so introduce in such a way that reader can understand your subject matter easily. While submitting an article author must add Title page having details of article

and author(s) before abstract. The title should be as short as possible on the first page and provide precise information about the contents. The title should be followed by full names of author (s). Use superscripts to indicate Corresponding author, designation and the affiliations of author (s) with institutional addresses. Title page must have corresponding email, contacts and Corresponding address also. Each author must provide their full name including their forenames and surname. The Corresponding Author of the manuscript must be marked with an asterisk*, and should be listed first. In addition, the corresponding author must include Telephone and E-mail address. If any of the co-authors are from different organizations, their addresses too should be mentioned and indicated using numbers after their names. Maximum four

authors should be allowed. In case of more than 4 authors the processing charge may be increased.

MAATERIALS AND METHODS

It should be complete enough to allow experiments to be reproduced. All the procedures should be described in detail, previously published procedures should be cited, and important modifications of published procedures should be mentioned briefly. Source of data and source of material to be used in the research are noted. Sub-headings should be used. Methods in general use need not be described in detail.

OBSERVATION

Methods of study as well as analytical and statistical methods are applied to observe the way of research directions.

RESULTS

Results and their significance should be presented clearly and concisely, preferably in the form of graphs and tables which should be self-explanatory.

DISCUSSION

It should contain a critical review of the results in the light of relevant literature. Results and Discussion may be combined.

Other aspects to write article for submitting to this journal are discussed to be as Illustrations and Figures; Figures must be numbered independently of tables, multimedia, and 3D models and cited as the relevant point in the manuscript text, e.g. "Fig. 1", "Fig. 2", etc. All figures including photographs should be numbered consecutively in Arabic numerals in the order of their appearance in the text and bear a brief title in lower case bold face letters below the figure. Do not duplicate data by presenting it both in the text and in a figure. For any figure directly extracted from previously published materials, you must have written permission from the publisher of that figure for reprint use. A copy of that permission release must be submitted with your article.

The Review articles should not be more than 10 pages and contain comprehensive coverage of relevant literature. Review articles should preferably be written by scientists who have in-depth knowledge of the topic. All format requirements are similar to those applicable to Research papers. Review articles need not to be divided into sections

such as Materials and methods, and Results and discussion, but should definitely have an abstract and introduction.

Short studies viz. Case study/ Short Review/ Book Review/ Chapter Review/ Short Communications/ Scientific meets or conference proceedings; The research and technical communications section of this journal (maximum 2,000 words) is open to interesting results worthy of publication without requiring extensive introduction and discussion. This section should be organized as follows: Abstract, Introduction, Materials and methods, Results and discussion followed by Conclusion. Not more than 10 references should be provided. Tables, figures and references are to be arranged in the same way as for research papers. Short Review/ Book Review/ Chapter Review need not to be divided into sections such as Materials and methods, and Results and discussion, but should definitely have an abstract and introduction.

CONCLUSION

This should state clearly the main conclusions of the research and give a clear explanation of their importance and relevance. Summary illustrations may be included.

ACKNOWLEDGEMENT

Acknowledgements is optional and should be placed in a separate section after the conclusion. If external funding has been obtained for the study, then that should be mentioned under a separate header "Funding", after the acknowledgements.

REFERENCES

1. The authors are responsible for the accuracy of the bibliographic information. It must be numbered consecutively in the order that they are cited in the text and designated by superscript with square brackets after the punctuation marks (^[X]). A list should be included on separate 1.5spaced pages at the end of the text. The style and punctuation of the references should confirm to the following examples:
2. Journal references-
3. Cantarelli MA, Pellerano RG, Marchevsky EJ, Camina JM. (Title of article). *Anal Sci*, 2011; 27(1): 73-8.
